

Active and independent
in everyday life, at school and at work

Including recommendations for doctors,
therapists and special needs advisors

Getting a grip on life...

Gripping and grasping are elementary bodily functions. Picking up and holding things, using and moving objects, are ways of »grasping« the world around us. Gripability develops innovative gripping and grasping aids designed to meet your needs. On your way to a more active and independent life we accompany you using our know-how and offering our products and our services. Gripability b.hand is of great benefit to you and at the same time very easy to use.

Focusing on a missing or limited hand function, Gripability supports doctors, therapists and special education teachers in helping their clients to more activity and independence, consequently to improve their quality of life.

Gripability b.hand

Flexible in day-to-day life...

By using Gripability b.hand you can extend your sphere of action considerably. You will find that many everyday tasks and leisure activities will become possible again. The Gripability b.hand is a new kind of gripping and grasping aid that was specially developed to add to your individual gripping and grasping skills. Handy and portable - your b.hand always within reach - just when you want to get a grip on something.

Whether the grip function is restricted uni- or bilateral, the use of the Gripability b.hand is recommended, whenever the application of a compact and mobile gripping and grasping aid leads to an extension of the capacity of physical action.

User categories: Function deficit of hand muscles due to neural system- or muscle disease, - impairment i.e. paresis, hemiplegia, hemiparesis, tetraplegia, spastic cerebral palsy, spastic quadriplegia, muscular dystrophy, post polio syndrome, etc...

Delight directed learning...

Learning means »grasping things«, »getting a grip« on them. These expressions indicate the significance of the gripping and grasping ability throughout the learning process. Taking action and handling your surroundings brings pleasure and adds to your life experience. Get a grip on life and take hold of your independence - the sooner you begin, the earlier your potential will become evident. With the Gripability b.hand you increase your independence, improve your dynamic and optimize your productivity while staying absolutely mobile.

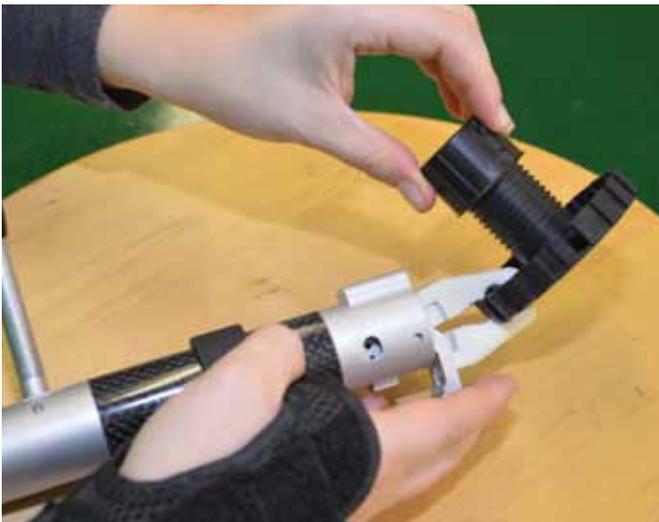

Learning is a holistic maturation process of mind, body and psyche. Sequences of actions become more complex and more challenging when the Gripability b.hand is applied with due regard to the needs of its user, in spite of the medical condition. Physical and intellectual activities are well-directed facilitated and trained thus the mind is strengthened.

Gripability b.hand

Competent and productive at work...

Whether in a workshop or in an office, with the ideal tools and the right equipment work is fun and each task can be handled more easily. With the Gripability b.hand you enrich your workplace adding a powerful and adaptable gripping and grasping tool. This way, you improve your skills and gain access to more challenging work tasks.

Self-fulfillment at work is of great importance for a positive sense of self-worth and a psycho-social well-being. In this connection the gripping and grasping ability plays a major role. Whether as a holding- or as an active-hand that is carrying out bilateral activities or as a free functional hand accomplishing unilateral tasks, the use of the b.hand opens new possibilities in therapy and facilitating. And the best thing about it - all this is done during working hours.

Easy to use...

Easy operation - step by step:

1st step:

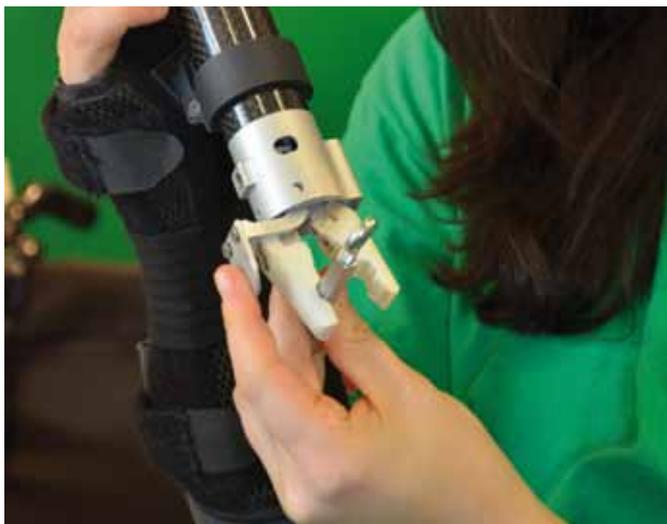

To open the grip fingers the clamping lever must be pushed forward until it clicks into place. The grip fingers now stay open.

2nd step:

Focus the object and place it between the grip fingers.

3rd step:

To close the grip fingers press the release tongue or the release pin. The gripper now closes and the desired object is firm in grip.

That's what we call: »the art of handling things«

The use of the Gripability b.hand is straightforward, practical and for everybody easy to learn. Its relevance in therapy is that the functional principle of the Gripability b.hand demands planned and clear structured actions and sequences of actions to be performed by its user.

Gripability b.hand

Adapted to your requirements...

Teaming up to carry out the right solution for you - a fitting to your personal needs provides the basis for you to obtain optimum performance with the Gripability b.hand. We achieve this purpose together with you and the people at your side. An intelligent modular system and our longtime practical experience make sure, that you get a grip on life enjoying your Gripability b.hand.

A perfect supply of a medical aid requires an interdisciplinary teamwork. The identification of the individual needs and the definition of the goals are worked out mutually with the user, his doctors, therapists and teachers. The fitting process as well as the evaluation of the result is carried out in the same way. Centre of attention at any time is the user.
